-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Objections

1. Claim 2 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The material for the mixer module of claim 2 is KETRON™ PEEK HPV, which is the same material as the mixer module of claim 1 (poly ether ether ketone reinforced with graphite and PTFE) as disclosed in page 1 of the specification, thus the limitation of claim 2 does not further limiting the claimed invention. Furthermore, Applicant is required to disclose in the claim the material that made up the trademark name KETRON™.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kopp in view of Ooitsu et al.

Kopp discloses a spray gun comprising a gun body 1 connectable to a first source 4, a second source 5, a port 26 for the first source 4, a port 27 for the second source 5, a mix module 37 located in the gun body 1 and communicating with ports 26 and 27, the mix module 37 also has a central bore 39, and a purge rod 32. Kopp does

not teach the mix module being constructed of a polyether ketone reinforced with graphite and PTFE lubricants. Ooitsu et al. discloses a casing 4 for a bearing wherein the material for the casing 4 is polyether ketone reinforced with graphite and PTFE lubricants (see column 9, lines 50-60). Therefore, it would have been obvious to one having ordinary skill in the art to have provided the mix module of Koop with a material being constructed of polyether ketone reinforced with graphite and PTFE lubricants as suggested by Ooitsu et al. Doing so would provide a device with a low coefficient of friction, excellent water resistance, and erosion resistance (see column 1, lines 11+).

Response to Arguments

4. Applicant's arguments filed 3/05/07 have been fully considered but they are not persuasive.

5. Applicant's arguments with respect to claims 1 and 2 have been considered but are moot in view of the new ground(s) of rejection.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dinh Q. Nguyen whose telephone number is 571-272-4907. The examiner can normally be reached on Monday-Thursday 6:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin Shaver can be reached on 571-272-4720. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
